

Power Restored to Blue Ridge Landfill Gas System

November 2, 2018

FRESNO, Texas (Nov. 2, 2018) – We shared yesterday that a power outage caused by severe storms impacted our landfill gas system and created the potential for off-site landfill odor. We are pleased to report that full power has since been restored to the Landfill, and our landfill gas system has resumed normal operations.

We are continuing our community odor patrols to monitor any potential off-site odor. If you happen to detect landfill odor, you can contact us on our hotline at **(281-668-9747)**, or online at blueridgelandfill.com/contact-us/odor-report, and we will investigate.

Thank you for your patience and understanding.
