

Blue Ridge Landfill Presents STEM Scholarships to Students at Turner College and Career High School

May 15, 2019

FRESNO, TX (May 15, 2019) – Last week, the Blue Ridge Landfill team presented two \$500 scholarships to students at Turner College and Career High School. The scholarship is for students continuing their STEM education at a four-year college or university, a two-year community college or a technical school in the state of Texas.

We were honored to present these scholarships as a tribute to students' academic excellence, as well as their commitment to environmental stewardship. We look forward to our continued partnership with Turner College and Career High School and wish the recipients the best as they continue their studies.
